

More insight. Better outcomes. Now across the entire continuum of care.

Our latest innovation to the ChartWise platform is delivering breakthrough CDI to outpatient workflows. It's the same KLAS-leading CDI software you're used to, now integrated across the healthcare continuum to increase documentation efficiency and accurately capture and measure risk at every patient encounter.

Automated RAF Scoring

ChartWise seeks, assesses and helps to patch holes in documentation that can adversely affect HCCs and RAF scores.

Smarter Queries

ChartWise combines a rich set of AHIMA-compliant queries to strengthen revenue integrity and smooth communications between clinicians and CDI specialists.

On-Demand Reporting

ChartWise is packaged with key performance indicators that automatically support a holistic, to-the-minute reporting system.
